## Lab Exercise 2– Terraform AWS Provider and IAM User Setting

Step 1: Create a New Directory:

```
mkdir aws-terraform-demo
```

```
cd aws-terraform-demo
```

Step 2: Create Terraform Configuration File (main.tf):

```
aws-terraform-demo > main.tf
1  terraform {
2  required_providers {
3  aws = {
4  source = "hashicorp/aws"
5  version = "5.31.0"
6  }
7  }
8  }
9  provider "aws" {
10 region    = "ap-south-1"
11 access_key = "AKIAYS2NV47DL6IMWZUT"
12 secret_key = "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"
13 }
```

Step 3: Initialize Terraform:

```
terraform init
```

```
PS D:\6 th sem\SPCM\SPCM LAB\teraform lab files> cd aws-terraform-demo
PS D:\6 th sem\SPCM\SPCM LAB\teraform lab files\aws-terraform-demo>
t : The term 't' is not recognized as the name of a cmdlet, function, script file, or
operable program. Check the spelling of the name, or if a path was included, verify that the
path is correct and try again.

    + FullyQualifiedErrorId : CommandNotFoundException

PS D:\6 th sem\SPCM\SPCM LAB\teraform lab files\aws-terraform-demo> terraform init

Initializing the backend...

Initializing provider plugins...
- Finding hashicorp/aws versions matching "5.31.0"...
- Installing hashicorp/aws v5.31.0...
- Installed hashicorp/aws v5.31.0 (signed by HashiCorp)

Terraform has created a lock file .terraform.lock.hcl to record the provider
selections it made above. Include this file in your version control repository
so that Terraform can guarantee to make the same selections by default when
you run "terraform init" in the future.

Terraform has been successfully initialized!

You may now begin working with Terraform. Try running "terraform plan" to see
any changes that are required for your infrastructure. All Terraform commands
should now work.

If you ever set or change modules or backend configuration for Terraform,
rerun this command to reinitialize your working directory. If you forget, other
commands will detect it and remind you to do so if necessary.
PS D:\6 th sem\SPCM\SPCM LAB\teraform lab files\aws-terraform-demo> |
